MARKANT MAX

MAX from Markant responds precisely to modern office needs: a healthy and active working environment. In order to help employees to perform as productively, efficiently and enjoyably as possible, MAX facilitates healthy, dynamic working. The best interests of both the employer and the employee are Markant's prime concerns.

MAX can easily be transformed from a comfortable sit-down desk to an active standing workstation. The lightning speed at which the workstation transitions from a seated position to a full standing option makes Max both functional and user friendly. MAX makes it possible to significantly limit the number of hours that office workers spend in a seated position every day. As a result MAX substantially reduces the risk of major health problems.

Healthy employees are more productive and more efficient. They enjoy coming to work and tackling tasks. This makes MAX an investment in employee vitality, productivity, creativity and satisfaction.

MAX is not just synonymous with healthy working. Max is not just synonymous with healthy working it also offers elegant design thanks to a broad range of configurations and an almost limitless choice of decorative wood finishes, fabric colours and patterns. Max can be made to adapt to any organization. The many functional accessories for cable management, power supply requirements and other needs complete Markant's MAX range.

INNER / SPACE

WORKING HEALTHILY AND KEEPING FIT

Office employees sit too much and for excessively long periods. We sit when we eat breakfast and when travelling to work, we sit for hours at a time at work, and finally, we sit during the journey back home. When we get home we are glad that we can relax on the couch after a long hard day at work. Even though our body is not designed for prolonged sitting, we are very good at it.

Many people sit more than 10 hours a day. Sitting is not just something that we frequently do at work, but also after work. We sit for as much as 85% of our leisure time. Prolonged sitting has become part of our modern way of life, but it is not without side-effects.

Recent scientific research paints an increasingly clear picture of these adverse side-effects. Prolonged sitting is a new health risk.

Sedentary behaviour increases the risk of complaints developing in the human movement apparatus and the risk of obesity, diabetes type II, cardiovascular disease and certain forms of cancer. So MAX has been designed to encourage Dynamic Working.

MAX is adjustable in accordance with international standards and offers a suitable height for all postures while working in both a sitting and standing position in an office.

MAX is a sit-down/standing desk for a vital and productive organisation.

We sit down to eat breakfast....

...travelling to work...

...at work....

...at home in the evenings in front of the TV!

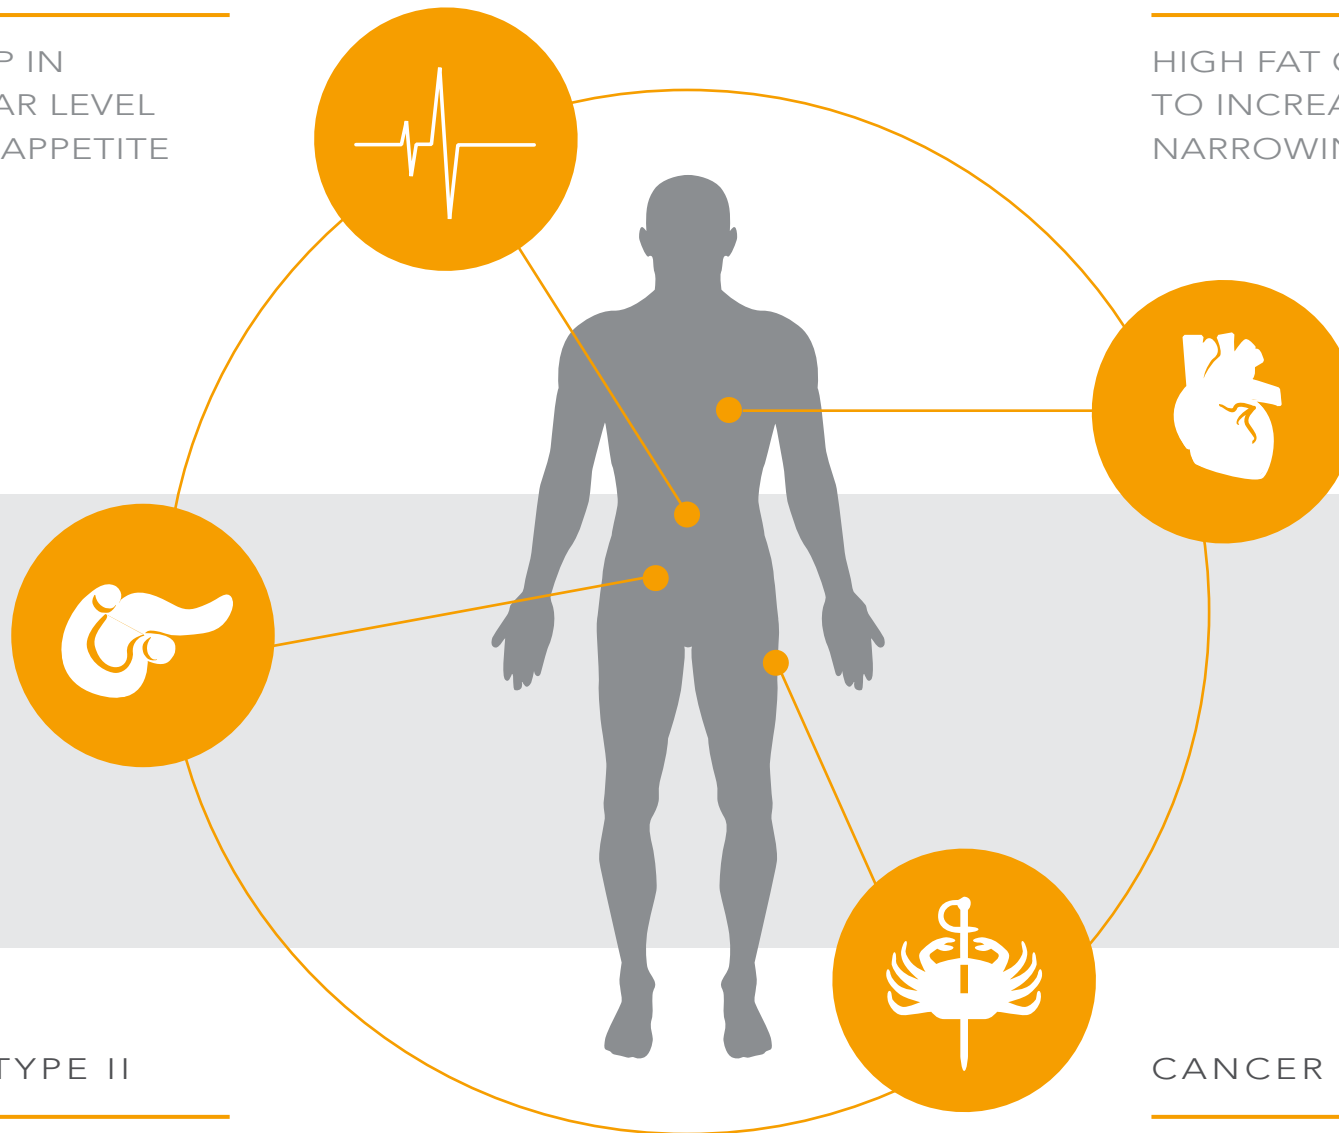

'Did you know that sitting for more than 10 hours a day increases the likelihood of premature death by 40 to 60% in comparison to people who sit for less than 4 hours a day?'

OBESITY

MAJOR DROP IN
BLOOD SUGAR LEVEL
STIMULATES APPETITE

CARDIOVASCULAR DISEASES

HIGH FAT CONTENT LEADS

INNER/SPACE

ACOUSTICS

- Fabric-covered partition for visual and acoustic separation
- High sound absorption due to a 10 mm thick foam layer
- Fully integrated power supply points and wiring

CONNECTABILITY

- Short, stable floor support between multiple duo-workstations
- Concealed cable runs from the floor or ceiling
- Optional provision of power supply points at the workstation

CABLE GUIDANCE

- Safe cable guidance to the workstation
- No loose cables hanging underneath the worktop
- Data and power cable separation

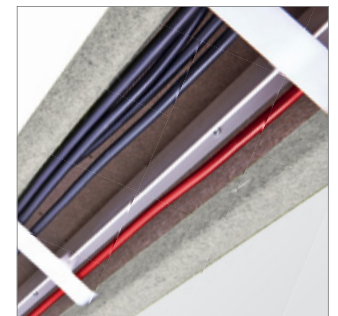

RANGE OF ADJUSTMENT

- Adjustable from 65-108 cm or from 65-128 cm
- Speed: 50 mm per second
- Silent adjustment via a low-noise motor

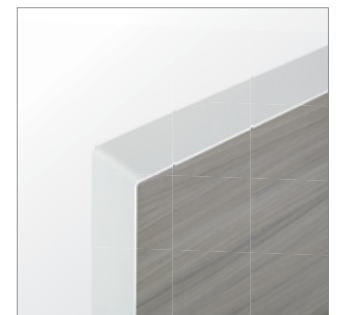

CABLE FEEDS

- All cables are fed through concealed passages in the partitioning
- Cable routing fingers separate data and power cables
- Equipped as standard with a three-connection power socket

AESTHETICS

- Panels and cabinets available in different decorative wood finishes
- Broad range of fabric colours and patterns for the partition wall
- Adjustment mechanism and wiring completely concealed

MAX T-RANGE

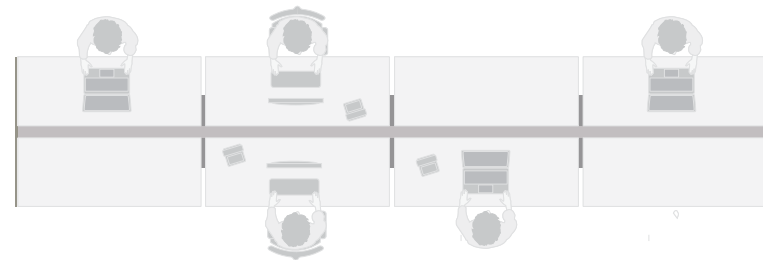

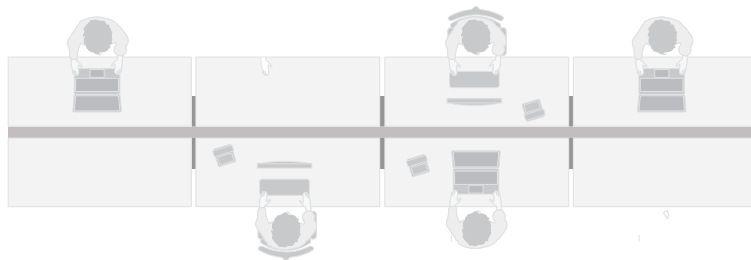

With the MAX T-range, Markant offers a keenly priced sit-down/standing combination desk, which is equipped as standard with an acoustic partition and features integrated wiring and power supply points.

MAX PANEL RANGE

The MAX Panel range consists of workstation clusters with knee-high floor panels at each end. These panels feature modern styling and neat edge finishing in the form of a steel strip. A choice of decorative wood finishes ensures a warm and uniform look & feel.

MAX CABINET RANGE

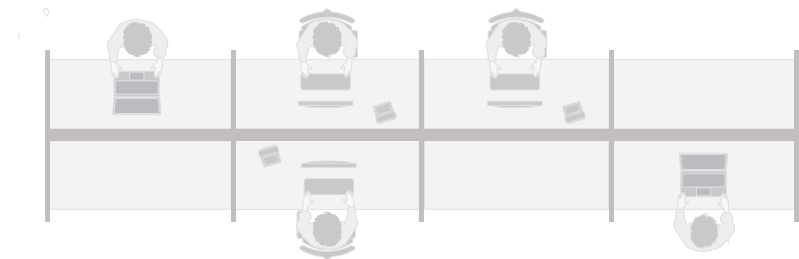

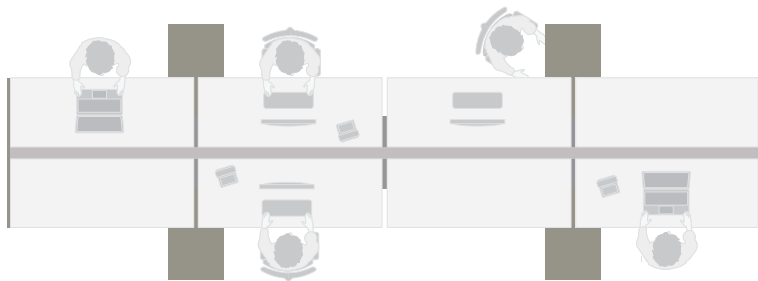

The MAX Cabinet range features integrated storage space between or at each end of the workstations. Ideal for bags, rubbish bins or files and equipped with a drawer for small office supplies. These cabinets can also be used to conceal computers, thereby making separate CPU holders under the worktop unnecessary.

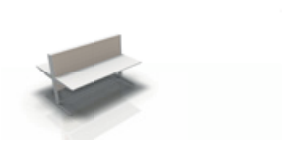

MAX SCREEN RANGE

The MAX Screen range workstations are sit-down/standing desks that are enclosed on three sides by fabric-covered partitions. The acoustic characteristics and guaranteed privacy of this product make the Screen range ideal for call centres or workstations where maximum concentration is required. A wide choice of fabric colours and patterns makes it possible to style the workstations to suit individual tastes.

MAX T-RANGE
