MARKANT CREATE YOUR OFFICE

MARKANT MOX

With the launch of MOx, Markant is introducing an exceptionally intelligent and contemporary furniture range. Sleek, business-like and technically perfect.
The symmetrical interplay between the desktop and the frame provides structure and harmony in the workplace.

MOx fits perfectly into a dynamic working environment.

The nature of the organisation and the work which takes place there greatly influence the ultimate choice of furniture. With MOx you can create an infinite variety of desk configurations, team workstations and meeting tables. This broad applicability means that the whole office can be furnished using MOx, thus creating a consistent look across the office.

MOx always offers a suitable solution.

INNER/SPACE

MOX WORKING WITH THE BACKBONE

WORK MEETING

Short and informal meetings are best conducted close to where you work. MOx offers countless meeting solutions which perfectly facilitate communication within the office.

HIDDEN WORK

Although the amount of available archive space per employee is falling because of the digitisation of information, there will still always be a need for storage space directly in or by the desk. Personal items are thereby neatly concealed from view, lending a tidy appearance to the working environment.

WORKING TOGETHER

In our knowledge economy it is critical that the people within an organisation make use of one another's expertise. They share and combine knowledge, as a result of which the end-result is greater than the sum of the parts. This requires an accessible working environment where collaboration is encouraged. At the MOx work islands.

FRAMEWORK

MOx is available with both a 4-leg frame and a contemporary O-frame. The height can be adjusted from 61 to 85 cm, which means that every user can find their ideal working height. MOx is the first Markant furniture range which is equipped with the updated Markant System Architecture (MSA), which means that the desks can be installed very quickly and without the need for tools (!).

NETWORK

All the desks are equipped with plastic cable clips as standard. For a more complex cable infrastructure, the cables can be concealed in spacious horizontal cable trays. The cable trays are fitted with holders for various sockets. This makes it easy to connect data and electricity to the desk.

HOT DESK WORKING

The MOx desks can easily be adjusted. The hot desks can be equipped with a manual or electric height adjustment. For desks where the user changes less often, there is the ingenious 'click mechanism' which allows the desk height to be adjusted without the need for tools.

MARKANT MOX DESIGN

The frames for MOx, both the 4-leg and O-frame, are manufactured from high quality 70 x 30 mm steel tube profile. This profile gives MOx its robust and elegant look. The frame is entirely constructed from non-composite materials, so that MOx can easily be recycled at the end of its lifespan. Composition documents are available for MOx which specify all the materials used in detail.

In parallel with the development of MOx, Markant has also designed a completely new frame. The new universal and modular construction is a refinement of the renowned 'Markant System Architecture'. It is therefore not just available in the MOx range, but will also become the standard for all future and existing Markant furniture ranges. The intelligent design of the 'beams' makes it possible to install MOx entirely without the need for tools.

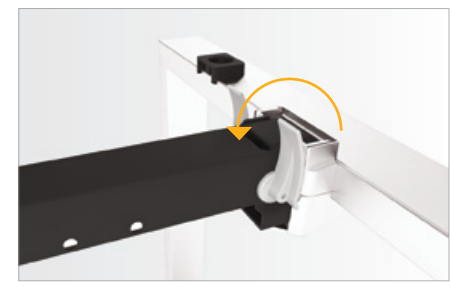

STEP 1

The end of the steel beam is hooked onto the mounting plate on the leg. Pushing down the handles on the beam creates a solid connection.

00:20 SEC

STEP 2

The desktop is also fitted without using tools. The underside of the desktop is furnished with ECO-fits. These are clicked into the ECO-connectors on the top of the frame.
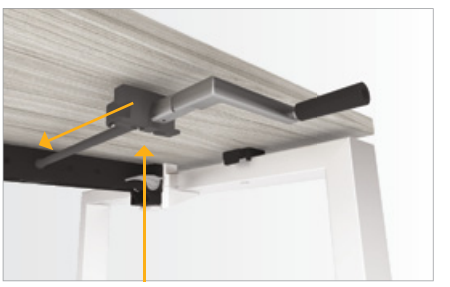

00:32 SEC

STEP 3

With a desk where the height can be adjusted manually, the drive spindle is inserted into the beam at right angles. The crank handle is attached to the desktop using the ECO-fits.

00:40 SEC

STEP 4

The user can now manually adjust the height of their desk using the crank handle over a range of 61 to 85 cm. This allows every user to match their desk to their height.

READY TO USE!

MSA

Lightning fast and tool-free assembly! MOx is the first Markant furniture programme with the renewed Markant System Architecture (MSA). Complete installation of the MOx work place can be completed within 40 seconds, without using tools.

HEIGHT ADJUSTABLE

Permanent height adjustment using the folding handle or the optional electric motor and digital display. The height of the work place can be adjusted without tools, using the 'click' system. MOx is also available at a fixed height of 75 cm for meeting situations.

ECO-FITS

The patented ECO-fits allow the work place to be assembled to the frame without using tools. The pre-assembled caps on the bottom of the work top click into the opening mounted on the legs. The connection with the work top can be locked in place by fastening and locking the clips on the eco-fit once the work top has been assembled.
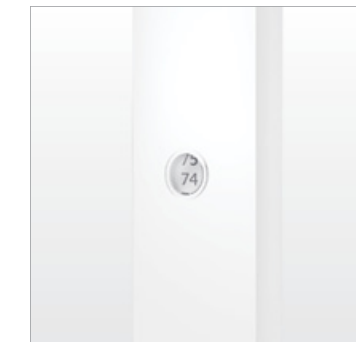

ACCESSORIES

The functionality of the work place can be improved by adding accessories like wire management solutions and screens. Screens can be mounted to the work top as well as the frame.

ERGONOMICS

The portal in the leg makes it possible to clearly read the configured work top height. The Click version of the MOx 4-leg does not have a portal because this place has been occupied by a button. In this case, the height can be seen at the bottom of the leg. The configuration range is between 61 and 85 cm high, in relation to the floor.

CONFIGURATIONS

Due to the many leg variants, it is possible to set up an endless row of desks, team work places and meeting tables. The design of the MOx is simple, professional and technically perfect. Due to the timeless design, an office environment with the MOx will always be up-to-date.

RECTANGULAR DESKS AND MEETING TABLES
Fixed height: 75 cm.
Dimensions: from 80 x 80 to 240 x 100 cm
in 20 cm increments.

RECTANGULAR DESK WITH ADD-ON
Adjustable height: 61 - 85 cm with click mechanism,
optionally with crank handle or electric adjustment.
Dimensions of basic desk: 160 x 80 to 240 x 100 cm.
Dimensions of side return: 60 x 60 to 120 x 80 cm.

4X RECTANGULAR DESK ON THE BACKBONE
Adjustable height: 61 - 85 cm with click mechanism,
optionally with crank handle or electric adjustment
Dimensions: 160 x 80 to 240 x 80 cm.
Backbone: see Backbone brochure for specification.

BENCH ARRANGEMENT WITH 'MYSCREEN'
Adjustable height: fixed height of 75 cm or 61 - 85 cm
with click mechanism.
Dimensions: 320 x 160 and 360 x 160 cm.
MyScreens: can be furnished with various fabrics or a
steel panel with or without acoustic filler

RECTANGULAR MEETING TABLES
Fixed height: 75 cm.
Dimensions: from 160 x 80 to 240 x 100 cm
in 20 cm increments.

FREESTANDING SQUARE MEETING TABLE
Fixed height: 75 cm.
Dimensions: 160 x 160 cm.
Tabletop thickness: 38 mm.

RECTANGULAR DESKS
Adjustable height: 61 - 85 cm with click mechanism.
Dimensions: from 80 x 80 to 240 x 100 cm
in 20 cm increments.

MIRRORED ARRANGEMENT WITH SCREEN*
Adjustable height: 61 - 85 cm with click mechanism,
optionally with crank handle or electric adjustment.
Dimensions of basic desk: 160 x 80 to 240 x 100 cm.
Dimensions of add-on: 60 x 60 to 120 x 80 cm.

BENCH ARRANGEMENT WITH SCREENS*
Adjustable height: 61 - 85 cm with click mechanism or fixed height.
Dimensions 320 x 160 and 360 x 160 cm.
Drawer units with various divisions 60 or 80 cm deep.

4X RECTANGULAR DESK WITH 'MYSCREEN'
Adjustable height: 61 - 85 cm with click mechanism,
crank handle or electric adjustment.
Dimensions: from 160 x 80 to 240 x 100 cm.
MyScreens: can be furnished with various fabrics or a steel
panel with or without acoustic filler.

RECTANGULAR MEETING TABLES WITH OVERHANG
Fixed height: 75 cm.
Dimensions: from 160 x 80 to 240 x 100 cm
in 20 cm increments.

MANAGER DESK
Adjustable height: 61 - 85 cm with click mechanism,
crank handle or electric adjustment.
Dimensions: from 200 x 100 cm to 240 x 120 cm.
Desktop thickness: 38 mm and a frosted glass panel.

RECTANGULAR DESKS
Adjustable height: 61 - 85 cm with crank handle or electric adjustment.
Dimensions: from 80 x 80 to 240 x 100 cm
in 20 cm increments.

MEGASPACE ARRANGEMENT WITH SCREENS*
Adjustable height: 61 - 85 cm with click mechanism,
optionally with crank handle or electric adjustment.
Dimensions of basic desk: 120 x 120 cm.
Dimensions of add-on: 40 x 80 to 120 x 80 cm.

2X RECTANGULAR DESK WITH SCREEN*
Adjustable height: 61 - 85 cm with click mechanism,
crank handle or electric adjustment.
Dimensions: 160 x 80 to 240 x 80 cm.
Scenarios: Stand Alone Cabinet.

4X CALL CENTRE WORKSTATION WITH 'MYSCREEN'
Adjustable height: 61 - 85 cm with click mechanism,
crank handle or electric adjustment.
Dimensions: from 160 x 80 to 240 x 100 cm.
MyScreens: offers an appropriate solution for every call centre
situation (inbound and outbound).

RECTANGULAR MEETING ARRANGEMENT
Fixed height: 75 cm.
Dimensions: MOx makes it possible to create an infinite
number of individual arrangements based on the
modular system.

MANAGER DESK
Adjustable height: 61 - 85 cm with click mechanism,
crank handle or electric adjustment.
Dimensions: from 200 x 100 cm to 240 x 120 cm.
Desktop thickness: 38 mm and a frosted glass panel.
Scenarios: Stand Alone Cabinet.

15 desktop sizes are available as standard. Alternative dimensions on request.
Desktops: 25 mm melamine-coated chipboard / 38 mm melamine-coated chipboard / 12 mm compact sheet.
